I'm someone who enjoys learning and putting in hard work. I graduated from Kerala University in 2023 with a degree in Computer Applications. I'm an enthusiastic and self-motivated software engineer passionate about programming and always eager to expand my skills. I'm currently seeking a good opportunity to further my career.

Experience

Software Engineer Intern

2024

I developed responsive websites and improved the backend of an employee management system during my internship at **StackUp Thiruvananthapuram**. The guidance and mentorship from experienced developers were invaluable, helping me expand my knowledge and refine my coding practices. This experience has strengthened my passion for software engineering and prepared me for future roles in the field

Project

Frontend Designing

Creating a responsive website using **HTML**, **CSS**, and **JavaScript** is an excellent first project to learn foundational web development skills. Focus on designing a simple layout, incorporating interactive elements, and using media queries to ensure it looks good on various devices.

Backend Development

Creating an employee management system using **Node.js**, **Express**, and **MongoDB** is a great backend development project. Use the Node.js environment with the Express framework to handle server-side logic, and **MongoDB** for the database. Manage dependencies and packages with **npm** to simplify the development process.

Education

High School

- Bio stream

Kerala,University

- Bachelor of Computer Applications (BCA)

2020-2023

Skills

- Html
- Css
- JavaScript
- Bootstrap
- MongoDB
- Version Control Systems
- Node.js
- Express.js
